

# What Gets Cut First

**When GRC teams run out of time**, critical activities get pushed aside.

Resource constraints aren't just slowing down GRC programs. They're forcing impossible choices. Our second annual [State of Continuous Controls Monitoring Report](#) reveals that **85% of organizations have delayed or eliminated essential GRC activities** due to limited resources.

**Here's what they're sacrificing to keep the lights on.**

## Control Testing and Monitoring

44%

When the foundation of a strong security posture gets pushed aside, organizations end up flying blind on their real risk exposure.

## Training and Awareness Programs

41%

When budgets tighten, employee education becomes a luxury. The result? A workforce unprepared for evolving threats.

## Risk Assessments

31%

Understanding your threat landscape takes a back seat to meeting immediate deadlines — until an unexpected risk surfaces.

## Incident Response Planning

25%

Preparation for the inevitable gets deprioritized... sometimes until it's too late.

**See the full data from 250+ InfoSec leaders** and discover the roadmap from aspiration to implementation.
