

Shift Compliance Left

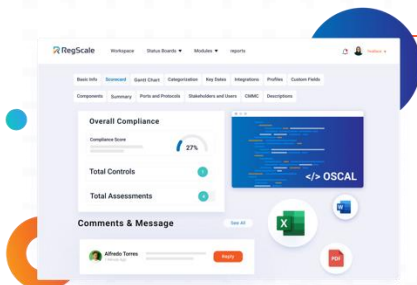

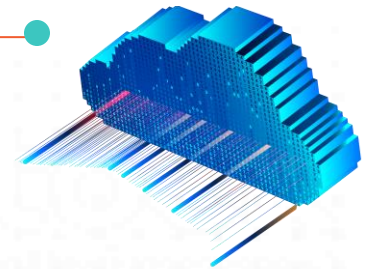

Future-proof your CI/CD pipeline and transform manual processes into real-time intelligent workflows with DevSecOps CCA.

RegScale's DevSecOps Continuous Compliance Automation Solution Delivers:

Integrated Pipeline Security

- ✓ Seamlessly integrate compliance checks into your CI/CD pipeline through our extensive DevSecOps integrations and compliance as code
- ✓ Ensure code is compliant from initial development through deployment, shifting compliance left while increasing velocity
- ✓ Maintain a history of your Software Bill of Materials (SBOM) on every build

Automated Vulnerability Management

- ✓ Centralize your vulnerability management, response, and reporting with intelligent automation
- ✓ Track and manage the entire vulnerability lifecycle to ensure that critical security issues never slip through the cracks
- ✓ Automatically generate POAMs, update documentation, and trigger escalations when SLAs are at risk

Risk-Aware Development

- ✓ Continuously monitor for risky dependencies, tool configurations, packages, and processes to reduce risk and exposure windows
- ✓ Power more secure development practices with automated risk detection across your SDLC
- ✓ Proactively mitigate risks before they impact production environments

Inherent Risk Visualization
