

We Wrote the Code on Compliance. Literally.

Shift Compliance Left and Prevent Security & Risk Issues

Easily Demonstrate Compliance Across the Entire Development Lifecycle

- ✓ **Save 200 hours** by automating detection and remediation of security hotspots and vulnerabilities, eliminating tedious rework.
- ✓ Improve developer productivity and reduce testing and implementation times.
- ✓ Use automated SBOM integration to **cut 40 hours** of manual package licensing validation per project.

Speedrun Your Evidence Collection with Intelligent Automation

- ✓ Cut manual tasks with automated evidence collection for every build.
- ✓ Leverage OCSF to continuously monitor and collect operational security and compliance data.
- ✓ Enable real-time compliance verification and comprehensive visibility.

Let AI Automate the Heavy Lifting

- ✓ Use AI to map your policies to controls, and leverage OSCAL to publish policy as code in a machine-readable format.
- ✓ Write your control implementation statements with **92% less effort**.
- ✓ Review your work with quality and completeness checks and improve control documentation **accuracy by 80%**.

Continuous Compliance for Ongoing Success

As a founding member of the OSCAL Foundation, we know the secrets to leveraging the NIST Open Security Controls Assessment Language. Use RegScale's OSCAL-native CCM platform to publish policy as code in a machine-readable format.

Build Better Applications with Compliance as Code

- ✓ Eliminate compliance findings by preventing security and risk issues before they become a problem.
- ✓ Integrate with security scanners like Wiz, Qualys, and Tenable, plus ITIL tools like Jira, GitHub, Gitlab, and dozens of other tools for streamlined issues management.
- ✓ Get real-time reporting so you're always up to date on your compliance and risk posture.

Serving Our Customers

Organizations in tech, finance, government, and other complex regulatory environments have chosen RegScale to simplify their risk and compliance programs while improving their GRC outcomes. Customers include:

- ✓ A leading national nuclear lab
- ✓ A top biometric identity verification company
- ✓ A large banking institution
- ✓ A multinational professional services firm
- ✓ And many more

Streamline development and accelerate release velocity.

Gain full-spectrum visibility and confidence from code to cloud.
