Realizing Zero Trust:
Access Control Simplified and Improved
Automated, Fast, and Now Available
without the Stare and Compare

89%
Workflow reduction for SOX Controls

60%
Reduction in audit prep & response

94%
Less effort for SOC 2 Type 2

Eliminate burdensome and manual stare and compare exercises by automating access reviews, resulting in enhanced security, reduced risk, and accelerating your Zero Trust initiatives.

Automated user access reviews ensure only the appropriate users who need to know have access to your sensitive information. RegScale serves as your cyber Gandalf, automating access reviews to ensure only authorized users may pass. With our automated gatekeepers, you weed out outdated or inappropriate access, preventing cyber threats, insider threats, regulatory fines, and breaches.

! Make no mistake, this isn't just a routine stare and compare of access control lists to check a compliance box – it's the razor-sharp edge of security, anchoring your Zero Trust Identity posture.

The Blind Bouncer

- **Blind Trust:** Manual checks, fumbling in the dark, hoping you've caught every access misstep.
- **Russian Roulette:** Play a dangerous game with regulators resulting in painful fines.
- **Data Breach Pending:** Leaving doors wide open to insider threats
- **Access Maze:** Stumble with complex reviews without a guide.

Fort Knox

- **Access Verified:** User access matches what's necessary, nothing more.
- **Compliance In-Sync:** Easily meet regulatory access review requirements
- **Breach Barrier:** Eliminate insider threats
- **Access Clarity:** Always know the precise state of your access control
