

RegML: Compliance at the Speed of AI

Intelligent Automation and Precision

Enhance every phase of your control lifecycle with RegScale's AI-enabled CCM platform.

80%

Complete control documentation in minutes

1-click

Control gap assessment scorecard

92%

Less effort to write control implementations

 RegScale

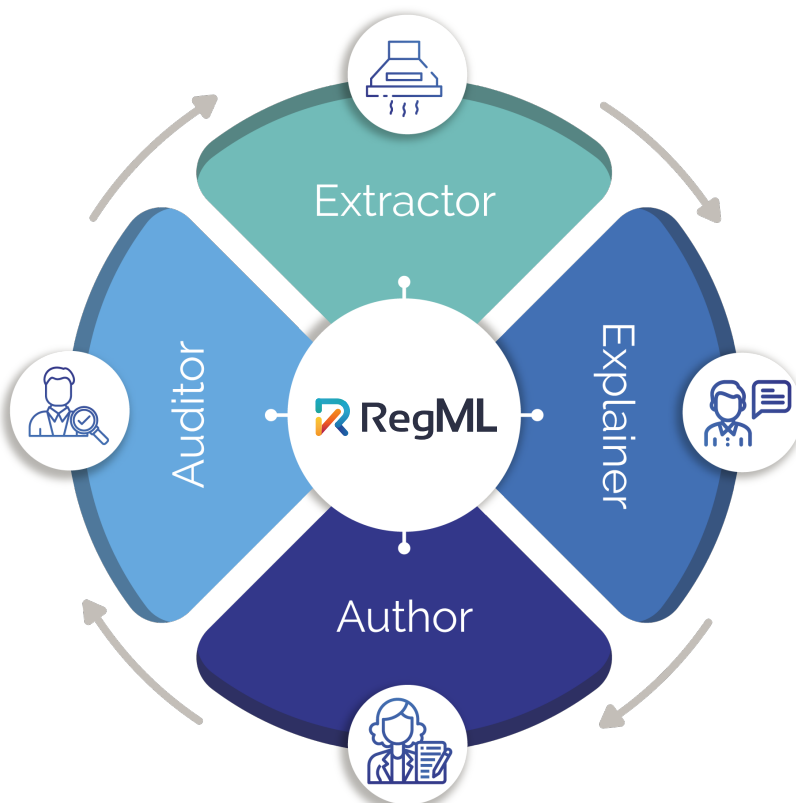

RegML from RegScale is your new AI Companion

RegML is your AI companion that securely combines Continuous Controls Monitoring (CCM) with any leading large language (LLM) tool, including Microsoft OpenAI, to streamline compliance management with intelligent automation and precision. Our one-click solution effortlessly generates comprehensive compliance documentation straight from existing policies and even offers a control gap analysis scorecard with in-depth recommendations.

RegML not only saves time and reduces costs but also elevates the quality of control documentation, fostering audit-readiness and confidence. Experience the transformative power of RegML and streamline your compliance management with our intelligent, scalable solution.

How does AI automation improve compliance?

- Reduces manual labor by translating policies to framework documentation
- Educates users in-app and in context with role-friendly summaries
- Reduces costs to get started and maintain programs
- Gains accuracy and precision in documentation
- Scales team with in-app guidance and expert services
- Focuses humans on the important stuff

AI Extractor

Compliance documentation automatically derived from your existing policies and procedures.

Get compliant faster, reuse documentation you already have, and let our AI generate the paperwork for you.

AI Explainer

Demystify the complexity of control statements. Designed to bridge knowledge gaps, our innovative feature targets the heart of complexity, providing users with crystal-clear explanations of intricate controls. No more second-guessing - whether you're a novice or a seasoned professional, RegML tailors control explanations based on your role, ensuring you grasp the control's intent effortlessly.

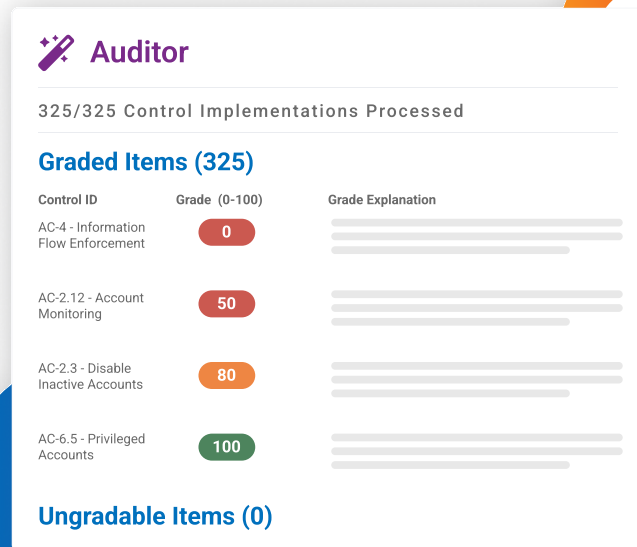

AI Author

Draft control implementation statements in context to satisfy relevant regulations and requirements. Reviewing a well-written control draft is faster than writing it yourself, and this ensures fewer errors and better accuracy.

AI Auditor

Wave the magic wand to evaluate controls on demand and recommend improvements in a single click, saving enormous time and effort. RegML quickly identifies gaps in controls and provides suggestions for precise improvements. This frees your team to work on the important stuff - fixing gaps and implementing controls. The result is higher quality control documentation for enhanced audit-readiness and confidence.

Auditor		
325/325 Control Implementations Processed		
Graded Items (325)		
Control ID	Grade (0-100)	Grade Explanation
AC-4 - Information Flow Enforcement	0	
AC-2.12 - Account Monitoring	50	
AC-2.3 - Disable Inactive Accounts	80	
AC-6.5 - Privileged Accounts	100	
Ungradable Items (0)		

RegScale supercharges every phase of your control lifecycle with seamless data integrations, self-updating paperwork, extreme automation, and **advanced AI**. Stay always audit ready, reduce costs, and improve your security posture to prepare for a cloud-native and rapidly changing technology landscape.
