RegScale

Secure AI Starts Here:
RegML for Sensitive Environments

Unlock the Power of AI Without Increasing Risk

Balancing the benefits and risks of adopting AI for GRC has been complicated-until now. RegScale's RegML AI agent enhances compliance from end to end while letting you retain full control over your sensitive data. RegML provides the same contextually aware capabilities wherever you use it: in the cloud, on-premises, or in a secure air-gapped environment.

Bridge Skills Gaps with AI Agents

✓ Accelerate the learning curve and bring new employees up to speed faster.

✓ Get visibility and accountability from start to finish.

✓ Translate compliance jargon into clear, actionable language based on your specific role.

Use AI Agents to Save Time and Resources

Organizations are embracing AI, but compliance and risk teams remain hesitant due to:

✓ Build a new compliance program in hours, not months.

✓ Eliminate error-prone work--and remove the guesswork about passing your audits.

✓ RegML is deployment agnostic! Available in the cloud, on-premises, or air-gapped.

Maintain Data Privacy and Security

✓ Trust RegScale's FedRAMP High Authorized platform, which meets the federal government's most rigorous security requirements for technology providers.

✓ Retain full control of your data, no matter the deployment.

✓ Ensure your sensitive information remains private, protected, and never repurposed – customer data I strictly excluded from RegML training.

Proven Impact: Our Track Record of Success

RegScale's powerful, AI agent helps organizations reduce costs, stay always audit-ready, and improve their security posture.

Recent Wins

➤ **Build security programs in hours, not months with RegML Author**

➤ **80% higher accuracy for control documentation**

➤ **Score vendor assessments 85% faster and 60% more accurately**

RegScale

Transforming the GRC Industry

✓ Policy & Compliance – RegML creates a program in hours and evaluates existing ones in minutes.

✓ Simplified Risk Management – AI finds the hidden risks others never see coming.

✓ Continuous Compliance Automation – RegML prioritizes issues in the DevOps pipeline, removing noise so you can target what really matters.

✓ Third-Party Risk Management – AI scores your vendors faster and more accurately.

Who We Serve: Our Growing Network

Organizations needing to met the most stringent regulatory requirements in tech, financial services, consulting, national security, and more have chosen RegScale to accelerate their compliance programs.

Using RegML, enterprises build complete compliance programs and security plans in hours, not weeks or months. Launch your new program before your old process could even book the kickoff meting. Our AI-powered solution eliminates the error-prone, manual work, accelerates your time to outcomes, and scales with your business.
