

Secure *from* **Code to Cloud**

Bridging Security, Risk, & Compliance

As organizations speed towards digital transformation, traditional GRC tools have fallen behind. Legacy GRC is struggling to keep up with the cloud, leaving companies with a mess of fragmented processes, manual tasks, and reactive risk management.

Generate GRC outcomes with our award-winning Continuous Controls Monitoring (CCM) platform. The cloud-native, automation-driven solution helps companies achieve better GRC outcomes in less time and at less cost.

-  **Reduce program costs**
-  **Strengthen security posture**
-  **Achieve rapid certification for faster market entry**
-  **Break down data silos**
-  **Anticipate threats via proactive risk management**
-  **Minimize painful handoffs**

Automate Your GRC

RegScale supercharges every phase of your control lifecycle with seamless data integrations, self-updating paperwork, extreme automation, and advanced AI. Reduce costs, stay always audit-ready, and improve your security posture within the rapidly changing regulatory landscape.

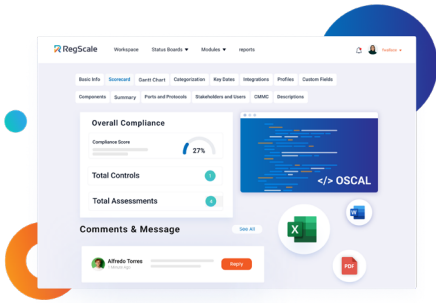

60% reduction in audit prep and response time

80%
higher accuracy with RegML's control documentation

94%
reduction in effort to complete SOC 2 Type 2

300x & 50%
FASTER TIME LESS COST
for FedRAMP High certification

30%
lower costs and faster timeline for CMMC

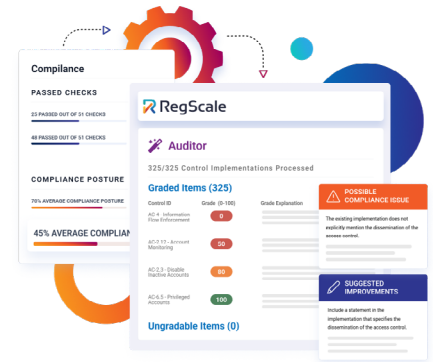

Embracing Compliance as Code

As the first OSCAL-native Compliance as Code platform, RegScale helps your developers stay focused on coding and your compliance team stay always audit-ready. Seamless tech integrations help to bridge security, risk, and compliance across your organization and future-proof your security posture.

AI-Enabled Compliance: Smarter, Faster, Easier

Our RegML tools use AI-powered automation to transform existing policies into comprehensive documentation, provide intelligent control gap analysis, elevate the quality of control documentation, and foster audit-readiness and confidence.

A CCM Success Story

The Naval Information Warfare Center (NIWC) Pacific uses RegScale's CCM platform to support COSMOS, its state-of-the-art cloud solution that offers 200,000% faster onboarding than any other GovCloud environment. NIWC's goal was to establish automated pipelines to streamline the ATO process and meet regulatory requirements like RMF documentation and cybersecurity continuous monitoring. **The agency ultimately saved 36+ weeks on the first five steps of the ATO/RMF process with RegScale.**

Organizations unlock the power of CCM
