The ROI Blind Spot

You're saving time and money with GRC automation.
But can you prove it to your board?

Compliance automation is delivering real results, with **97% of organizations reporting time savings** in our 2026 State of Continuous Controls Monitoring Report. But many organizations can't effectively measure or communicate those wins to their boards. Without clear ROI data, it's becomes impossible to justify ongoing investment in the GRC automation initiatives that are actually working.

THE VISIBILITY PROBLEM

Only 26%

of organizations say their current compliance tool provides excellent or comprehensive ROI tracking, with 19% reporting poor or limited ROI visibility.

Another 55% describe their ROI measurement capabilities as fair or good: **functional but not ideal.**

? What Organizations Are Trying to Track

Speed of reporting or evidence collection	74%
General efficiency gains and time savings	72%
Improvements in risk detection or mitigation	72%
Reductions in errors or compliance gaps	55%

Learn how leading organizations are measuring their automation ROI.
